

Screenprinted Bathing Suit

- 1.) Buy a plain bathing suit. In my case I bought a baby size at the dollar store.
- 2.) Create your designs by cutting out shapes on your circuit out of black card stock.
- 3.) Follow YUDU instructions to make 3 burn screens.
- 4.) Tape off shapes one by one using packing tape. Then reveal the shapes one by one to print them.

4.) Cont.

Use this "tape off" method
to print layers using diff.
color inks.

Continue this process until
you are happy \exists have all
the colors you want.

Fun in the Pool! Yea!

XOXO

LL
