

Washable Floor Cloth

1.) Cut cotton heavy duty canvas to the size you'd like your floor cloth to be.

Note: you may want to go a little larger as the canvas may shrink in the wash.

2.) Wash & Dry the canvas

3.) Paint the canvas in the color of your choosing. Make sure the paint is water based acrylic or latex.

4.) Allow to dry completely.

5.) Now ready your YUDU -
using YUDU instructions to burn
your screen & print.

6.) For my design I used the
Heratige cartridge & the
Teaset design.

7.) I used the YUDU to
print the design.

Allow printed design to dry
completely.

8.) Use white sharpie paint marker
to outline shapes. Allow to dry.

9.) Use Clear polyurethane to coat
the entire front side of the
cloth. Allow to dry completely.

10.) At this stage you can sew binding onto the edges. I did not do this as I like the look of raw edges.

11.) I did sew extra large ric-rac across the top

Now throw it on the floor & use it! It washes up nicely in the washing machine!

Enjoy!
