

Screen Printed Laptop bag.

- 1.) I found the hot pink Laptop bag in the dollar section at Target.
- 2.) I used the vintage type writer shape from the Heratige Cartridge & cut the shape out of black construction paper.
- 3.) I used this black paper cut out to create a screen for the YUDU for instructions visit: whatdojudo.com.
- 4.) I 1st printed the design in lime green, allowed it to dry and then printed it again, slightly offset in blue.

5.) For the charm I also used the Heratige cartridge & cut on my Cricut.

6.) Burned it to a Yudu screen and for this I printed it on silver fabric vinyl.

7.) Once it was completely dry, I cut around the shape, punched a hole in it and attached a small plummers chain.

*now attach it to your laptop bag.

Enjoy
