

Sculpey Halloween Jewelry

Steps:

1. Ready the three colors of sculpey clay, silver, orange and black, by warming them up in your hands. Create a ball large enough that when pressed flat will cover your whole image you want to capture.
2. Using the Provo Craft **Boo To You** Embossing Folder, press the Sculpey into the folder, capturing the image in the clay.

3. Once you lift the Sculpey off of the embossing folder, lay in onto a clean surface and clean the edges.
4. Bake Sculpey in to oven according to their directions.
5. Cut grey circles of felt to back the Sculpey pieces.
6. Cut dark purple or black felt slightly larger then the grey to be the final backing piece.
7. Sew the grey and dark felt pieces together, in an * asterix pattern, leaving long strings of thread hanging off to create a spooky effect.

8. Glue Sculpey, grey felt and dark felt all together with E-6000 glue.
9. Flip over and attach the pin back, also with E-6000.

10. Cut a piece of jersey knit fabric to a scarf scale. Choose a width and length that works for you. I used a black and grey stripe. Sew edges to prevent fraying.
11. Attach pins to the scarf – enjoy!
